ABOUT ME

Passionate React Developer with 6 months of experience in building responsive web applications using React.js, TypeScript, Tailwind CSS, and Inertia.js. Skilled in writing clean, efficient code and collaborating with backend teams to deliver seamless single-page applications.

EDUCATION

Master of Computer Applications (MCA) | 2024 – Present
Parul University, Vadodara
Currently pursuing MCA with a focus on advanced software development, web technologies, and modern frameworks.

Bachelor of Computer Applications (BCA) | 2021 – 2024
Bhagwan Mahavir University, Surat | CGPA: 7.8
Completed undergraduate studies with strong foundations in programming, database management, and web development.

WORK EXPERIENCE

Frontend Developer | April 2025 - Present
Codelab7 , Surat
At Codelab7, I worked as a Frontend Developer where I developed and maintained responsive and user-friendly web applications using React.js, Inertia.js, TypeScript, and Tailwind CSS. I collaborated with backend developers , ensuring seamless communication between frontend and backend. My role involved building reusable and modular React components to enhance scalability and reduce development time, while also optimizing UI/UX for better performance, accessibility, and cross-device compatibility.

SKILLS

Programming: Skilled in **JavaScript** and **TypeScript** with a solid foundation in writing clean, efficient, and maintainable code for dynamic web applications.

Frontend Development: Proficient in **HTML**, **CSS**, and **Tailwind CSS** for creating responsive, accessible, and visually engaging user interfaces. Experienced in building scalable single-page applications using **React.js** and **Inertia.js**, with a focus on reusable components and performance optimization.

Additional Skills: Familiar with modern frontend workflows, version control (**Github**), and best practices in UI/UX to deliver high-quality web applications.

PROJECTS

Passbuk.com – Accounting Software

Tech Stack: React.js, Redux, Tailwind CSS, REST API, Git, VS Code

Developed and maintained a responsive web-based accounting application designed to streamline financial management for businesses. Implemented user-friendly interfaces and dashboards using React.js, ensuring smooth navigation and accessibility. Integrated reusable components, optimized state management, and handled form validations for modules like ledger management, expense tracking, invoicing, and reports. Collaborated with the backend team to consume RESTful APIs and ensured efficient data handling with real-time updates.

Divour – Jewellery Shop Management

Tech Stack: Inertiat.js, Tailwind CSS, REST API, Git, VS Code

Developed a web application for a London-based jewellery store to manage product catalog, stock tracking, and customer orders. Designed a responsive and elegant UI with Inertia.js and Tailwind CSS, optimized for showcasing jewellery items. Implemented CRUD operations for inventory management, integrated RESTful APIs for real-time data handling, and built search and filtering features to improve product accessibility. Collaborated with the backend team to integrate billing and order management, ensuring smooth shop operations.
