ABOUT ME

Enthusiastic Frontend Developer with 2 years of experience and a strong passion for creating engaging and efficient web applications. Adept at problem-solving and learning new technologies quickly, with a strong focus on delivering high-quality user experiences. Motivated to contribute to innovative projects while continuously improving and staying updated with modern development practices.

EDUCATION

Master of Computer Applications (MCA) | 2024 – 2026
Parul University, Vadodara
Completed Master of Computer Applications (MCA), with a focus on advanced software development, web technologies, and modern frameworks.

Bachelor of Computer Applications (BCA) | 2021 – 2024
Bhagwan Mahavir University, Surat | CGPA: 7.8
Completed undergraduate studies with strong foundations in programming, database management, and web development.

WORK EXPERIENCE

Frontend Developer | April 2025 - Present
Codelab7 , Surat
At Codelab7, I work as a Frontend Developer responsible for designing, developing, and maintaining high-performance, responsive web applications. I leverage React.js and Next.js to build scalable, server-side rendered and statically generated applications that deliver fast load times and excellent SEO. Using Inertia.js, I bridge modern single-page application experiences with robust Laravel backends, ensuring smooth and efficient client-server communication without the complexity of a separate API layer.

Frontend Developer | February 2024 - March 2025
Hopiant , Surat
At Hopiant, I began my professional journey as a Frontend Developer, where I built a strong foundation in modern web development practices. I was responsible for translating detailed UI/UX designs and wireframes into clean, semantic, and fully responsive web interfaces using HTML, CSS, JavaScript, and React.js. Working within a collaborative team environment helped me develop strong communication skills and an understanding of real-world software development workflows.

SKILLS

Programming: Skilled in writing clean and maintainable code using JavaScript and TypeScript.
Frontend Development: Building responsive and visually appealing interfaces with **HTML**, **CSS**, and **Tailwind CSS**, with a strong focus on performance optimization and clean architecture. Experienced in developing scalable single-page applications using React.js with reusable components, optimizing rendering performance through **code splitting, lazy loading**, and **memoization**.
State Management & Routing: Proficient in managing application state efficiently with **Redux** and **Zustand**, and handling client-side routing with **React Router**.
Full-Stack & Frameworks: Experienced in building high-performance web applications using **Next.js** and **Astro**, leveraging server-side rendering (SSR), static site generation (SSG), and modern frontend architecture to improve performance, scalability, and SEO.
API & UI Development: Skilled in seamless API integration using **Axios**, form handling and validation with **Formik**, and crafting modern, accessible UIs with **shadcn/ui** and **Material UI.** Familiar with **Inertia.js** and strong **UI/UX** design principles.
AI-Assisted Development: Experienced in leveraging AI tools like **Claude AI** and **Cursor AI** for code generation, debugging, refactoring, and improving development productivity while maintaining code quality and best practices.
Best Practices: Committed to clean code principles, scalable architecture, and delivering high-performance, production-ready applications.

PROJECTS

Passbuk.com – Accounting Software
Tech Stack: Next.js, Redux, Tailwind CSS, REST API, Git, Cursor
Developed a responsive web-based accounting application using Next.js, ensuring fast performance with server-side rendering and a smooth user experience. Built reusable UI components, managed state with Redux, and implemented core features like ledger management, expense tracking, invoicing, and financial reporting.
Worked directly with Claude AI to design and implement AI-powered features, including intelligent transaction categorization, automated financial summaries, and natural language query support, enabling users to gain insights quickly without navigating complex reports.

KundliGPT – AI Astrology Platform

Tech Stack: Astro, React.js, Tailwind CSS, REST API, Git, Cursor AI

Developed and maintained a live AI-powered astrology platform using Astro and React.js, delivering a fast, responsive, and engaging user experience. Built reusable and scalable UI components with Tailwind CSS while integrating RESTful APIs to enable seamless communication between the frontend and backend. Focused on writing clean, maintainable, and optimized code by improving existing components and enhancing overall application performance. Collaborated closely with backend developers to implement dynamic features and ensure smooth data flow across the platform. Leveraged Cursor AI to accelerate development, improve code quality, and streamline the frontend development workflow.

Diahearts – Global Diamond Catalog & eCommerce Platform

Tech Stack: React.js, Tailwind CSS, REST API, Git, Cursor

Developed and contributed to the live jewellery eCommerce platform Diahearts, where I worked on production-level features and handled real-world user interactions. Designed a responsive and visually appealing UI using React.js and Tailwind CSS, optimized for showcasing jewellery collections and enhancing user experience. Focused on code optimization by implementing reusable components, clean architecture, and efficient state management. Collaborated with backend teams to integrate RESTful APIs, ensuring smooth data flow for inventory, billing, and order management while maintaining high performance and scalability.
